Sharp Shooters
Small Arms Range

RULES OF THE RANGE FOR RIFLE SHOOTING

Ammunition Rules

All rifle ammunition must be inspected by the Range Master before use. You may bring your own ammo but absolutely no steel core or steel jacketed ammo may be used on the range. The use of steel core or steel jacketed ammunition will be grounds for permanent banning from the range.

Anyone caught using armor–piercing , incendiary or tracer type ammunition will be permanently banned from the facility.

Any shooter found using ammunition that has not been inspected by the Range Master may be permanently or temporarily banned from using rifle calibers at Sharpshooters. This is at management discretion.

30-06 will be considered the maximum rifle cartridge allowed. Any ammunition between 6MM and 30-06 may not exceed 3000fps in velocity. .17, .22 and 5.56MM rounds will not exceed 3,300fps. This means no 22-250, 220 Swift and other similar hyper velocity 22 caliber cartridges.

Large Caliber Rifle Ammo. Any rifle cartridge with a caliber greater than .30 may not exceed 2,500fps.

No belted magnum rounds of any type are allowed.

Black Powder. Absolutely no black powder guns or ammunition may be used. The use of black powder or black powder substitutes will result in permanent banning from the range.

Range Rules

You must present the range officer with your Rifle Pass if you intend to shoot rifles.

Targets for center-fire rifle cartridges must be placed no closer than the 15 yard line.

Targets must be placed so the rounds fired will strike the center of the backstop. Remember shooters of differing heights may not be able to shoot the same target without adjusting its position.

There is no restriction to how fast you may shoot but all rounds fired must strike the target and backstop. Hitting the floor, overhead baffles or target carriers can result in a permanent ban from the use of rifles, or the range.

Rifles will be bagged and un-bagged in the booth, no handling of rifles behind the red line.

Shooting from the hip or any other form of unsighted shooting is not allowed.

Stand fully forward in the booth so that the muzzle is in front of the booth.
